

Children Party FAQ's:

What time of the day should I hold my party? I find starting your party between 1:00 and 3:00 pm is ideal for most children's birthday parties.

When is a good time to start the magic show? I recommend 30 minutes after the party start time. This will accommodate the kids who may be running late.

How long should my party last? I would suggest 1.5 to 2.5 hours.

Do you need a table or any other supplies? No thank you, I will bring everything I need.

How much space will you need? I can fit into most areas but a space 6 feet by 5 feet is ideal. If there is a coffee table, you might want to move it out of the way beforehand, the kids usually sit on the floor. If you choose the "Supreme Show" I will need additional space to levitate the birthday child.

Can you have your show outdoors? I can, but the wind can be an issue.

Is a deposit required? I usually require a \$50 deposit. You can pay using PayPal on my Web site at www.glennsmagic.com or send a check/money order payable to Glenn's Magic.

Is there a limit to the number of children? I can perform for any number of children, but there is an additional charge for over 25 children.

When will you arrive? I will arrive 45 to 60 minutes before the show to set up. During my set up time I do appreciate if you can keep the children busy during this time.
